INVESTMENT PROCESS Fixed Income

Eagle's process combines top-down analysis of the overall economic and market environment with bottom-up scrutiny to find individual issues that we believe will perform well in all types of markets and outperform if our top-down analysis of the economic environment is validated.

Key Elements:

- Sector avoidance/allocation
- Security selection
- Proactive and timely corporatecredit analysis, independent of the ratings agencies
- Duration management
- Use of Aaa structured products in place of short-term Treasuries

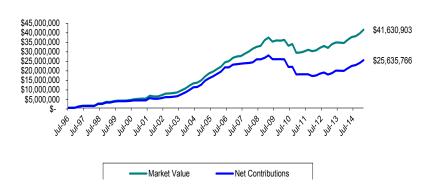

There is no guarantee that the investment goals/objectives will be met.

MARKET VALUE

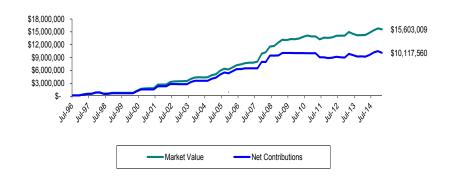

Public Agency Compensation Trust (Data shown as of March 31, 2015)

Claims Account

Activity	
Initial Value	\$575,000
Net Deposits (Withdrawals)	\$25,060,766
Income + Appreciation (Depreciation)*	\$15,995,137
Total Market Value	\$41,630,903

INFLATION UNLIKELY WITHOUT WAGE GROWTH

YoY nominal wage growth (in %) in each of the past 37 months has been lower than it was in any month between 1992 and fourth quarter 2003

CIVILIAN EMPLOYMENT

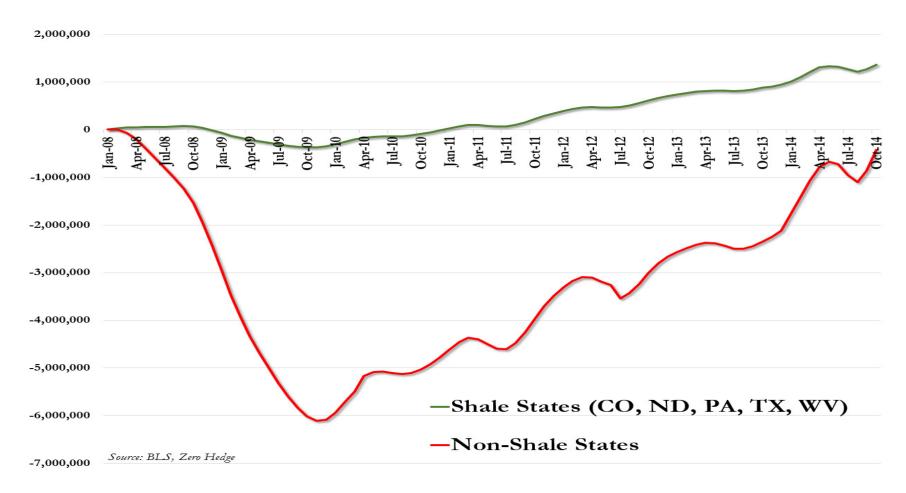

GAS PRICE CUT 'STIMULUS' EFFECT? NOT NECESSARILY

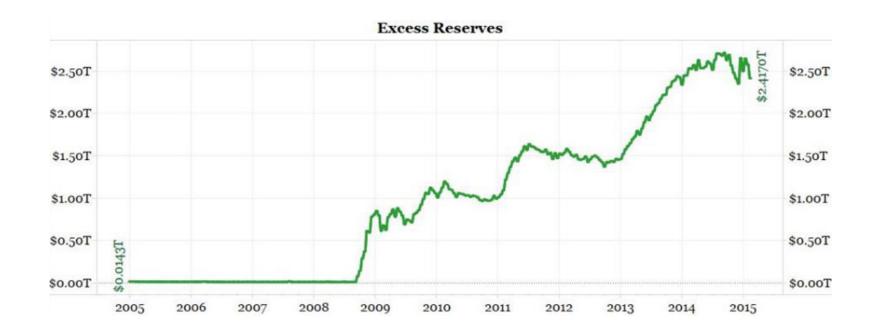

Jobs in America - Shale vs. Non-Shale States

KEY EURO YIELDS

- Required reserves increased from \$47 billion to \$138 billion
- But, excess reserves increased from \$14 billion to \$2.4 trillion
- Massive over reserves mean the Fed Funds market is almost nonexistent
- New tools are needed to raise rates
- I The futures markets diverge from forecast

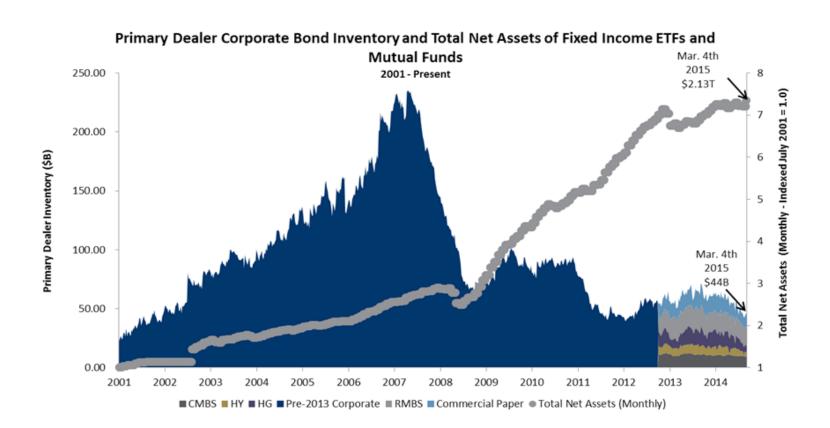

CREDIT RALLY EXTENDED, POTENTIAL FOR CORRECTION

HOW EAGLE IS RESPONDING TO NEW MARKET DYNAMIC

- New technology
- New order management system
- Rules based allocation
- Price setting vs. price taking

LOOKING AHEAD

GDP:

- 4th quarter GDP estimate was revised to 2.2%
- Growth fell short of expectations following promising 2nd and 3rd quarter data

Inflation:

- Inflation fell to 1.1%, below the Fed's 2% target
- Core CPI (which removes Food & Energy) was unchanged at 1.7%

Fed Policy:

- Maintains the target rate for federal funds at 0 0.25%
- Expectations that the Fed will begin to raise interest rates in mid-2015 are being pushed back due to below-forecast economic data

Employment:

- March unemployment rate was 5.5%
- The labor participation rate of 62.7% is the lowest since December 1977

LOOKING AHEAD

Market Overview:

- Rates across the treasury curve fell in the first quarter
- I Risky-assets treaded water while enduring periods of volatility, as credit spreads ended the quarter virtually unchanged

Interest Rates:

Continuing weak global growth, geopolitical concerns and falling oil prices lead to falling rates in the first quarter

Strategy:

- Trade up in credit quality
- We are overweight Credit and Securitized
- Look for issues that offer proper compensation for the underlying risk
- I Focus remains on quality assets that will perform well during a prolonged period of economic uncertainty

Notes

- 1. Eagle Asset Management, Inc. ("Eagle") has prepared and presented this report in compliance with the Global Investment Performance Standards (GIPS®).
- 2. Results for the full historical period are time weighted and calculated monthly. The composites are size-weighted by beginning-of-month values.
- 3. The Composite Dispersion is a size weighted standard deviation of annual returns for those accounts that were in the composite for the entire year. Dispersion is not meaningful (N.M.) because there was only 1 portfolio in the composite for the full year.
- 4. See Note # 5 which refers to Fees and Transaction Costs within Notes to Schedules of Rates of Return.
- 5.* The benchmark is the BARCLAYS CAPITAL INTERMEDIATE GOVERNMENT Bond Index which has been derived from published sources and has not been examined by independent accountants.
- 6. The three year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period. The three year standard deviation is not presented for 1994 through 2010 because it is not required for periods prior to 2011.
- 7. Figures include accounts under Eagle's management from their respective inception dates, including accounts of clients no longer with the firm.
- 8. No selective periods of presentation have been utilized. Data from all accounts have been continuous from their inception to the present or to the cessation of the client relationship with the firm.
- 9. No alteration of composites as presented here has occurred because of changes in personnel or other reasons at any time.
- 10. A complete list and description of firm composites and calculation of performance results is available upon request. The composite creation date for GIPS® purposes was January 2001. The composite inception date is January 1993. Performance is based upon U.S. dollar returns.
- 11. From composite inception through 2014, non-fee paying accounts were below 1%.

Note # 5 Fees and Transaction Costs

As of March 31, 2015, the maximum advisory fees charged for institutional accounts are as follows:

Intermediate Fixed Fee Schedule

- 0.40% on assets under \$2,000,000
- 0.30% on assets between \$2,000,000 and \$10,000,000
- 0.25% on assets between \$10,000,000 and \$50,000,000
- 0.20% on assets greater than \$50,000,000

FOOTNOTES Government Securities

Eagle Asset Management, Inc. is an investment adviser registered with the Securities and Exchange Commission and is engaged in providing discretionary management services to client accounts. Founded in 1976, Eagle Asset Management provides institutional and individual investors with a broad array of equity and fixed income products via both separately managed account and mutual fund platforms.

A complete list and description of all of Eagle's performance composites are available upon request by calling 800.237.3101.

Institutional Government Securities – concentrate their activity in U.S. Treasury Notes with maturities from one to ten years. Additional investments may include debt obligations issued or guaranteed by various U.S. Government agencies, e.g. Federal Home Loan Banks, Federal Farm Credit Banks, and Federal National Mortgage Association.

The definition of accounts included in the Institutional Government Securities Composite is as follows:

1993 - 2014 The Institutional Government Securities Composite reported on herein from inception through 2003 was defined as all accounts with the above defined objective that exceeded \$2 million in assets which paid for transactions on a commission basis, gave Eagle discretionary authority regarding the selection of brokerage firms and are allowed to participate in new issues. In addition, these accounts are less diversified among industry sectors and are generally less tax sensitive than retail accounts. From 2004 - 2014, the objective is for accounts that exceed \$1 million in assets
